

Terminal verification record

Reproducible outputs collected from the experiment workspace

Program test

```
$ python code/text_stats.py code/sample.txt --top 8
tokens: 67    unique: 56
1 and 3 | 2 a 2 | 3 codex 2 | 4 git 2
5 test 2 | 6 the 2 | 7 zhi 2 | 8 kong 2
```

Validation

```
$ python -m py_compile code/text_stats.py
PASS: syntax check completed
$ python code/text_stats.py code/sample.txt --top 0
PASS: rejected with exit code 1
```

Git history

```
$ git log --oneline --graph --decorate -n 5
* 293077d (HEAD -> main, origin/main, origin/HEAD) update README from remote
* 4c692ac add experiment result and report
* ab6c0d2 add first experiment program
```

Remote sync

```
$ git push -u origin main
OK: local bare remote received main
$ git pull --ff-only
OK: fast-forward from 4c692ac to 293077d
```

Workspace check

```
$ git status --short
At this checkpoint: original template files remain to be packaged;
the final clean status is checked after adding the report PDF.
```
